ATTENTION!

Do you have Vermiculite insulation in your attic?

ZAI is a loose-fill, non-roll **vermiculite** home attic insulation, which may contain naturally occurring **asbestos**. It was sold from the 1920/1930s to 1984, and it was sold or manufactured by Grace under the brand name of "**Zonolite Attic Insulation**" and by others under [various other names](#). ZAI may have a glittery granular appearance. The granules are shaped like a small nugget and expanded like an accordion and may have a silvery, gold translucent or brownish cast. After years in the attic, the granules may darken to black or grey. ZAI may be found underneath subsequently installed insulation of other types such as rolled fiberglass insulation. ZAI generally looks like this:

*Contact us immediately **(514) 802-7326** if you suspect that your attic contains this type of insulation and we will be happy to provide the names of companies to get it tested for asbestos content and removal.
